

# New MSC Campus Construction Continues at Rapid Pace

Awaiting new neighbors, one of the many sets of picture windows in the new library overlooks construction of Hearnese Hall.

Construction on the new college campus at the site of the old Mission Hills farm is progressing close to schedule, according to College President Leon Billingsly. The library building which was the first to be started will be completed early in 1967, enabling the staff to begin stocking shelves and complete the switchover in an orderly fashion. M-P Construction Company President Minford Potter told faculty members before the start of school that he hoped to make a Christmas present of the building.

The Board of Regents named the library the George A. Spiva

Building this summer. Dr. Billingsly said that the naming was in recognition of "Spiva's fine efforts in behalf of the college."

In various stages of construction are the administration building,

First among many buildings on the new campus, the new George A. Spiva Library nears final completion by the M-P Construction Company.

named for Missouri Governor Warren E. Hearnese, the science and mathematics building, and a music and fine arts complex.

With the contractors' promise that the buildings will be ready by next summer, college officials are making plans for the move next year.

The one exception to the list would be the proposed student union cafeteria building, which is to be financed by the sale of reve-

nue bonds. Dr. Billingsly said that the Regents are also considering dormitories, but that the current high interest rates will cause them to take a long look before making a decision later this year.

In addition to the new construction, the administration is also remodeling existing structures to be used this fall and when the college is officially moved. Buildings have been or are being pre-

pared for the nursing program and the automotive technology program.

The College Players have appropriated the old dairy barn and are converting it into a theatre. Drama instructor Duane Hunt said that the work on the old barn will continue through the school year using salvaged material and student help. "We hope to have it completed in June," he added.

While the buildings are still taking shape, contractors are also hard at work paving streets and parking lots. The parking lots will be one of the most welcome changes, especially for the student long accustomed to walking several blocks from his car to the campus. Work on grading and paving the drives and parking lots is already well under way.

### Thespians to Tryout Tuesday For First Semester Productions

An innovation in drama tryouts is scheduled to begin at 1:30 Tuesday afternoon, September 20 in the Little Theatre. Milton Brietzke and Duane Hunt, drama instructors, will hold the first double tryouts for both first semester plays, the casts of which will be simultaneously posted September 21. The directors feel that such an arrangement will aid their selection of 31 characters for both plays in that they can allot the talent available according to the needs of the play. They also believe it will assist the performer in planning his semester's work load.

Plays scheduled this semester are "Blithe Spirit" by Noel Coward, and "The Corn is Green" by Emylyn Williams.

Blithe Spirit, to be directed by Hunt, concerns the dilemma of Charles, a mystery writer, when a medium named Madame Arcati summons his deceased wife, Elvira, back into the land of the living.

The comedy fantasy theme is developed as Elvira, whose antics can be observed only by Charles and the audience, plots to break up her husband's present marriage with Ruth.

Although the play was written in the 1930's, the present production will be staged in contemporary dress.

Set in a Welsh mining village in the latter decade of the nineteenth century, "The Corn Is Green" centers around the trials of Miss Moffat, a dedicated spinster who endeavors to establish a school within the village. Her attempts are met with opposition on the part of the mine owners, who use the ignorance of the miners as a tool to keep them happy in their poor working and living conditions.

The comedy drama, directed by Brietzke, was one of the best on Broadway during its run in the 40's, and increased the popularity of its star, Ethel Barrymore.

### Classes Schedule Elections for Tuesday

Freshman and sophomore class elections are scheduled for Tuesday, September 20. Nominations will be made in assemblies second hour, with freshmen meeting in the auditorium and sophomores congregating in the student center. Voting will follow.

Both classes will elect a president, vice-president, secretary-treasurer, and parliamentarian. Student Senate members in proportion to enrollment will also be selected. All candidates wishing to run for office are required to secure a nomination petition from the office and collect the signatures of 15 or more classmates.

### Semester Enrollment Hits New Peak

Enrollment for day school soared to an all-time high of 1501 last week, sending administration into a roundup of auxiliary facilities for classroom space. Dr. Belk,

director of admissions, added that approximately 50 enrollment packets from pre-registration are also being held over in the event that students responsible for them

complete enrollment before today's deadline. Over 300 enrolled for the evening division last week, but the final figure will not be available until Monday.

Efforts to obtain additional accommodations to meet the increased enrollment were initiated August 15 with the beginning of pre-enrollment. An innovation in registration procedures, pre-enrollment continued until August 31, when 1340 students had enrolled.

Final enrollment was held September 6-9 during which time students not pre-enrolled secured counseling in the cafeteria, while pre-enrolled students paid fees, became acquainted with student organizations, and had opportunity to purchase yearbooks and student directories.

Physical accommodations for the larger student body have been arranged in the education building of the Episcopal Church and the office formerly occupied by President Billingsly, who moved to the Mission Hills mansion. To provide additional faculty office space, a building at 901 Wall has been rented to house the division chairmen.

Dean Cinotto attributed the increase to the popularity of college draft deferments and the opportunity for students enrolling this year to complete their degree under the four-year program.

The Summer Cabinet sponsored orientation Saturday.

Caught in the crush of a record enrollment, an incoming freshman seems dazed by the whole business.

## Operation Head Start

The end of this week sees sophomores settling "back in the groove" and freshmen partially discovering what is expected of them in a college situation. But for all students, the completion of the first week points out the use that can be made of other weeks before the semester ends.

At this point, the potential honor student and the potential dropout have the same opportunity to utilize their chances of a successful college experience. The chance of the latter to occupy the lot of the former depends upon the determination the student establishes early in the semester, for the same determination applied early is much more effective than that desperately summoned to "squeak through" a course at the semester's end.

Although the official New Year looms months in the future, the present situation calls for some scholastic resolutions to be made now with a firm intention to carry them out. A few courses which may not offer an initial challenge may give many students the misconception that regular study is not necessary, but it isn't until his lack of background creates a problem in handling a course that he belatedly discovers the necessity for consistent and early studying.

The adage "An ounce of prevention . . ." applies emphatically to the establishment of a healthy scholastic record. In realizing this, the administration has lengthened the time of enrollment and initiated more adequate placement procedures, hoping to give each student a chance to enroll in the classes for which he is best suited, and, therefore, where he has the best chance of succeeding. Such concessions should motivate enrollees to want to strive for scholastic achievements. Still, all but a small portion of the semester's outcome will depend upon the merit of the individual.

So the opportunity which later may be wasted is immediately at hand, waiting to be grasped by the conscientious. The first week has passed, and the "new" of being back in school should be relatively worn off, so Monday shouldn't be too early to organize "Operation Head Start." —K.A.F.

## JOTS

Phillip Wiland, former president of the Student Senate, and executive director of the Missouri College Republican Committee, spoke up for Missouri College GOPs, August 17, in favor of the House Committee's investigation of campus protests against the Viet Nam war. Wiland, who has been working this summer in the office of Representative Durward G. Hall of Missouri, is enrolled at the University of Missouri at Columbia.

Kathy Wilson and Larry McCorkle, returning sophomores, were married June 26 in the Jasper Christian Church, and are now at home in Jasper.

The College Players are planning a field trip on September 30 to attend a presentation of "The King and I" at the Springfield Little Theatre.

Rayma Coy, 1966 graduate, received third place in an editorial contest sponsored by Freedom and Union Magazine among youth of all NATO countries. In connection with the award, she was a guest at convocations in Springfield and New Salem, Illinois.

Robert Jordan, a 1966 alumnus, spent the summer working in Philadelphia, Pennsylvania, with the Women's International League for Peace and Freedom. The project was a result of his being awarded the Hull memorial scholarship offered by the Jane Adams Peace Association.

Vicki Albers, Phil Doran, and Cheryl Peck, sophomores of Missouri Southern College, volunteered their summer months this year to help poverty-stricken people in Kansas City in the Methodist Inner City Parish. Along with other student volunteers, they concentrated on supplying these people with food, clothing, adult job training, tutoring for children, and homemaking skills.

Cheryl Dines, 1965-66 Chart co-editor, became the bride of Jack Burke August 20 at St. Peter's Catholic Church. They both are enrolled in Kansas State College in Pittsburg.

Larry Martin attended the University of Missouri at Rolla this summer under provisions of a National Science Foundation institute grant. He studied analog computers, linear programming, and numerical analysis to apply towards a doctorate.

Larry Dunham studied at the University of Missouri at Columbia this summer under a Curators scholarship for teachers in Missouri colleges. He took literature courses to apply towards a doctorate.

Gail Renner took political science courses at M.U. to apply toward an advanced degree.

T. L. Holman studied economics at Purdue University, Lafayette, Indiana, for six weeks this summer under a grant from General Electric.

Sophomore Sally Anderson's picture appears in the August issue of Glamour magazine, an edition emphasizing "College." Sally received the title "Miss Missouri Southern" last spring in the annual contest to select the most appropriately dressed girl on campus. Girls receiving similar titles from 346 other colleges are also pictured.

## Trio Plays It Cool in Labrador

"Okay, fellas, once more right from the top." "Put your little foot, put your little foot . . . ." says Pat to Bob and Dave.

Three Missouri Southern sophomores are still catching up on their sleep following a hectic summer of globe-hopping, working, and sightseeing. Pat Randall, Bob Macy, and Dave Robinson, also known as William and the Conquerors, spent the summer combining business with pleasure, brain storming across the country playing engagements before night club audiences.

Catering more to the "cool school" rather than the "frug flock," the talented trio started the week of finals last semester in Wichita with a two-week stand. Then in close succession the group moved on to Indianapolis, Indiana, Springfield, and Neosho, Missouri.

Short "gigs" were also played at Pittsburg and Parsons, Kansas.

But the real treat of the summer came with a two week booking at Fort Belvoir, Virginia in July, and at Labrador, Newfoundland, for four weeks in August. While in Virginia, the Missouri Southern Stage band members combed nearby Washington, D.C. sightseeing like millions of other Americans. Although it was tiring, working until late at

night and then getting up early the next day to see the sights, all three felt it was an opportunity they couldn't miss.

While most Missourians sweltered during the hot days of August, our cool classmates made the most of their booking in chilly Labrador, playing at a cocktail lounge on the Goose Bay Air Force Base.

Their sleeping accommodations were only a hundred yards from the main runway, they said, where big jet bombers took off all hours of the night. As a matter of fact, there were all kinds of planes using the runway, making sleeping rather difficult if not impossible.

The boys likened their hotel, an old reconditioned barracks in Goose Bay, to "something right out of the old Phil Silvers show."

Following their return late in August, William and the Conquerors were busy playing at St. Roberts, Missouri, near Fort Leonard Wood. Now that school is starting the musicians will be back at their places in the stage and concert bands. Nights, though, they will be playing at the Black Orchid on West Seventh Street.

## Our Mascot

## 20 Join Faculty and Administration

Twenty new faculty members, including four division chairmen, have assumed positions at Missouri Southern College for the 1966-67 year. This is the largest number to be added in one year since the College started in 1937. Last year, 13 were added. Of the 20 augmenting the faculty this fall, 16 are additions necessitated by increased enrollment and expansion of curriculum.

Alphabetically listed, the new members include:

Dr. James Altendorf, chairman of the Science and Mathematics Division, who was formerly in charge of the science department at Southwestern College, Winfield, Kansas. Dr. Altendorf received an Associate of Arts degree from the Community College at Independence, Kansas, a Bachelor of Science degree from Kansas State College of Pittsburg, and a Doctor of Education from Oklahoma University.

Dr. Floyd Belk, director of Admissions and Research, was formerly associated with the Joplin School System. He graduated from Joplin Junior College and received two degrees from KSC. This summer he received an Ed.D. from Oklahoma University.

Miss Marie Bickett, English instructor, received a Master of Arts degree from Creighton University, Omaha, Nebraska. Miss Bickett has taught in grade school and high school.

Miss Martha Jane Blades, an English instructor, received an Associate of Arts degree from Parsons Kansas Junior College, a Bachelor of Science degree from the University of Kansas, and a Master of Arts from KSC. She last taught at Independence Kansas Community College.

Mrs. Enid Blevins, an English instructor, received a Bachelor of

Science at Southwest State College and a Master of Science at Kansas State College at Pittsburg. She taught English and French at Carl Junction High School.

Darrell Dishman, art instructor, formerly taught at Independence Kansas Community College. Dishman received a Bachelor of Fine Arts degree from Kansas City Art Institute and a master's degree from Kansas State College at Pittsburg.

Mrs. Cora Ditto, assistant librarian, received a Bachelor of Science degree from KSC and a Master of Library Science degree from Kansas State Teachers College at Emporia. She has done graduate work at Denver University, the University of Minnesota, and at Colorado State College, Boulder. Mrs. Ditto has served as librarian with the Carthage School System and as a librarian and teacher at the Fredonia, Kansas, Junior High School.

Charles O. Gosch, physical science instructor, received a B.S. Ed. from Ozark Wesleyan, an A.B. degree from Baker University, and an A.M. from Stanford. Gosch was employed for a number of years with the research department at Eagle Picher here in Joplin.

Miss Juanita Hulén, an instructor in MSC's new nursing curriculum, has had extensive nursing experience. Miss Hulén received Bachelor of Science and Master of Science degrees from Kansas State College, Pittsburg.

Mrs. Gwen Hunt, English instructor and graduate of Joplin Junior College, received a bachelor's degree from SMS and a master's from the University of Arkansas. She has taught at Crowder College and in MSC Evening Division.

First Division Chairmen of Missouri Southern College confer during enrollment. From left to right are Dr. James Altendorf, chairman of science and mathematics; Dr. Charles Niess, chairman of education, psychology, and physical education; Dr. Ervin Dunham, chairman of humanities and fine arts; James K. Maupin, dean of semi-professional and technology; Keith Larimore, chairman of business and economics; and Harry Gockel, chairman of social science.

Forrest Kellogg, assistant professor of sociology, is working towards a Ph.D. at the University of Missouri. He has been teaching at SMS.

Mrs. Pamela Kendrick, mathematics instructor and graduate of JJC, received a Bachelor of Science degree from Kansas State College at Pittsburg.

Keith Larimore, chairman of the Business Education Division, and a JJC graduate, is working towards a Ph.D. from the University of Arkansas.

Dwight Mason, automotive tech instructor, received a Bachelor of Science degree from Oklahoma State University in the College of Technical Institute Education and has done some advanced study. He was formerly associated with research in fuels and lubrication with the Phillips Petroleum Company of Bartlesville.

Dr. Charles Niess, chairman of the Education and Psychology Division, formerly directed the laboratory school of Kansas State

Teachers College at Emporia. He received an Ed.D. degree from Colorado State College, Greeley.

Dr. Orty E. Orr, associate professor in the biology department, received a Bachelor of Science degree from Kansas State College of Pittsburg, and Master of Science and Ph.D. degrees from Oklahoma State University.

Mrs. Jeanean Sears, nursing instructor, was previously associated with Sale Memorial Hospital in Neosho. She received a Bachelor of Science degree from the University of Kansas.

Sam Starkey, psychology and physical education instructor, received a Bachelor of Science in Education and a Master of Education from the University of

Arkansas. He spent 13 years coaching and teaching, including five years at John Brown College, Siloam Springs, Arkansas, and three years at the College of the Ozarks, Clarksville, Arkansas.

William Taylor, instrumental music instructor, has taught music for the past five years at the Rogers Arkansas High School. Taylor received Bachelor of Science and Master of Science degrees from the University of Arkansas.

George Volmert, who previously worked with the Joplin School System, is associated with guidance and counseling. He received Bachelor of Science and Master of Science degrees from Northeast Missouri State Teachers College.

## Eli Attends Adult Education Institute

John Eli, coordinator of Adult Basic Education, attended the Adult Basic Education Teachers Training Institute in August at the University of Missouri at Kansas City. The workshop was devoted to training 105 teachers from 24 states in the unique problems and procedures involved in teaching the adult deficient in formal education.

Financed by Title 11B of the Economic Opportunity Act, the workshop was one of nine held throughout the nation. From that conference, 20 instructors have returned to Missouri positions, where they in turn will impart their knowledge to the instructors they supervise who teach the Adult Basic Education classes.

According to Eli, students composing the classes of 12 to 15 each are those whose jobs have been eliminated through advances in technology and those who have had insufficient opportunity to obtain a grade school or high school education. He added that these people have a keener appreciation for education and are extremely eager to learn, which explains the low dropout rate in this strictly voluntary program.

Asked about the economic advantages of holding such classes, Eli replied that on the average, each person who cannot obtain steady employment because of education deficiencies costs the federal government approximately \$40,000 during his lifetime by living on welfare. By contrast, the same person can be trained to maintain a stable role in society for approximately \$1,500.

Adult Basic Education was started in this immediate area last April, and classes which can be

expanded to accommodate as many students as indicate an interest are tentatively scheduled to reconvene September 19 under the direction of James K. Maupin.

## Community Symphony Organizes for 1966-67

College students and instrumentalists from Southwest Missouri met Monday night in the auditorium to organize a Missouri Southern College Community Symphony Orchestra. William L. Taylor, college instrumental music director, said that there are still positions open for qualified players.

Four concerts are scheduled for the season. The first concert will be in conjunction with the College Choir, directed by Oliver Sovereign, on November 7. In the spring the drama department will join forces with the orchestra to produce a musical comedy.

Standard symphonic works and "pops" will be included in the repertoire for the first season.

## 1962 Graduate Hines Dies of War Injuries

First Lieutenant Philip B. Hines, 1962 Joplin Junior College graduate who was critically wounded, March 21, in South Viet Nam, died July 6 in Bethesda Naval hospital, Maryland. He was buried in Osborn Memorial cemetery in Joplin, July 11.

Lieutenant Hines served with the Third Battalion, First Marine Division, was graduated from Kansas State College of Pittsburg.

His parents, Mr. and Mrs. Blaine Hines, live in Galena, Kansas.

## Area High School Brings Problem To MSC Experts

Every once in a while a college is asked to perform an unusual service and MSC is no exception. This time it was to help a high school principal make a difficult decision. Jack Scott, principal at McDonald County R-1 High School at Anderson, sent a plea for help when it came time for selecting the school's cheerleaders.

The new high school was formed from several smaller schools and each had its own cheerleading squad. In fact, there were 25 girls, including Scott's own daughter who wanted to help cheer their team to victory. So, realizing that discretion is sometimes the better part of valor, Principal Scott asked MSC officials for help.

Help was quickly mobilized. A committee made up of two faculty members, Dean Dudley Stegge and Miss Venus Yount; two cheerleaders, Patty Francisco and Pam Eliason; and secretary Carolyn Beers, was selected.

The 25 girls were brought to Joplin for tryouts and the MSC experts trimmed the list to eight cheerleaders and two alternates.

Dean Fred Cinotto, who helped set up the judging committee, said that the college was glad to help. "It's just one of our many services."

Dean Fred Cinotto, center, stops to visit with two new faculty members, Dr. Floyd Belk, director of admissions and research, and Mrs. Cora Ditto, librarian.

# Technical-Professional Programs Get Underway; Others to Follow

Mrs. Jenean Sears, Mrs. Bessie Vediz, and Miss Juanita Hulen examine records of students in the first nursing class on the new campus.

For the first time, the Semi-Professional and Technical Education Division will offer degrees in nursing and automotive technology. Dean James Maupin, chairman, said that plans are also being formulated for programs in computer programming and dental assistance, scheduled to begin in the fall of 1967.

Twenty-five candidates comprise the first nursing class, which is directed by Mrs. Bessie Vediz. In addition to Mrs. Vediz, two other instructors, Miss Juanita Hulen and Mrs. Jenean Sears, have been employed to teach the class. All of the instructors have had experience teaching in schools of nursing, but the three said that they are looking forward to their first experience of working with an associate degree program.

In addition to their regular morning classes, the student nurses are scheduled to report to the new campus each afternoon, where the nursing program has been temporarily housed in one of the smaller buildings surrounding the Mission Hills mansion. The permanent location of the program will be in the modern house formerly located in front of what is now the new library. Now situated across the highway from the Missouri State Retardation Clinic, the building will be occupied by the nursing classes following the completion of sewage facilities.

Classes will be conducted in nursing theory every afternoon for the first six weeks of the program, after which practical laboratory experience will be conducted at St. John's Hospital on Tuesday and Thursday. Later experience is planned at other area hospitals, schools, health agencies, and Missouri State Hospital

Number 3 in Nevada. Additional work in the nursing library will also be conducted during the afternoon session.

Accredited by the Missouri State Board of Nursing, the program is designed to qualify graduates for positions in general staff nursing, industrial nursing, health team participation, and other related fields. Students obtaining the associate degree will also be eligible to take the Missouri State Board examinations to become Registered Nurses.

The automotive technology classes have been initiated in one of the smaller buildings near the College Theatre on the new campus, under the instruction of Dwight Mason. Current plans call for enlargement of this building. Already \$13,000 worth of shop equipment has been purchased, and major auto manufacturers, such as Ford, Volkswagen, Rambler, and General Motors have donated \$15,000 in major parts.

Such well-paying jobs as mechanical shop repairman, parts supervisor, dealers, shippers or field representatives await the graduate, Dean Maupin noted. Moreover, the transferable credits could be applied to a bachelor's degree from such four-year colleges as Kansas State or Oklahoma State.

In addition to the courses in nursing and automotive technology, two other technical courses are on the planning board—computer operator and programmer, and dental assistant.

The State Department of Technical Education has recently granted verbal approval to MSC's proposed Computer Operator and Programmer program. Although final plans depend on federal funds for equipment, an outline

## Teacher Experiences Rigorous Instruction At NSF Seminar

Harrison Kash, chemistry instructor, attended a six-week seminar this summer at Oregon State University with all of his expenses paid by the National Science Foundation.

The theme of the conference related to three areas of chemistry. Emphasized were the role of instruments and instrumental methods of analysis, a review of the atomic structure and chemical bonding, and selected topics in modern organic chemistry. Laboratory periods in the latter area included an application of ultraviolet, infrared and nuclear magnetic resonance spectroscopy to the elucidation of the structure of organic molecules.

"The level of instruction was high and rigorous," the local instructor reports. "We 30 participants were taught by authors of chemistry textbooks, but perhaps the most important facet was the meeting with other college teachers and sharing knowledge and ideas concerning chemistry."

for the program has been drawn up. The basic curriculums in the new program would include secretarial Key Punch, Computer Programmer, and Operator for business Application, and Programmer for Science and Engineering.

Comprising the advisory committee for the proposed program and equipment are Dr. Paul Shipman, administrative assistant; John Jackson, director of the Computer Center at Rocketdyne; Don Miller, director of data processing at the Joplin First National Bank; and Louis Holland, director of Electronic Data Processing Department of Empire District.

The dental assistant curriculum is still in the planning phase, Dean Maupin reported, but should plans continue according to schedule, the classes will be opened for the 1967 fall semester.

An advisory committee, headed by John Windle, DDS, is forming an outline for the program, which will be housed in the science and mathematics building.

## Missouri Southern Joins Talent Search

Missouri Southern College has joined forces this year with seven other Southwest Missouri colleges to help academically capable but "financially distressed" students in the newly-created Central Ozarks Talent Search Center, according to Dr. Paul Shipman, administrative assistant at MSC and Center representative.

Financed by a \$68,000 federal grant, the project is on an operational basis directed by Russ Robinson of Southwest Missouri State College. Cooperating institutions in the program are Central Bible Institute, Drury College, Evangel College and SMS in Springfield; School of the Ozarks, Point Lookout; Southwest Bible College, Bolivar; Crowder College, Neosho; and Missouri Southern.

The purposes of the Talent Search Center are to find students who have academic or creative promise in either college or vocational institutions and who are financially distressed; to make available to the students information and forms of financial assistance; and to advise member colleges to meet and encourage these students to continue their education beyond high school.

Shipman said each member college will emphasize technical or academic facilities in which they are especially strong. "Missouri Southern is strong in nursing, vocational-technical training, business, and teacher education," he added.

Seven counselors were appointed in late August and each was given certain search areas in which to work. The counselors will conduct their search by tapping secondary school facilities and member college files for educational talent.

Robert B. Wing of Carthage was appointed counselor for Jasper County, the Joplin parochial schools, Vernon County, and all Barton County, except Lamar and Golden City. Wing has a Bachelor of Arts degree from the University of Minnesota and a master's degree from Washington University.

## For Employment Consult Dean Stegge

All students interested in supplementing their income as they continue their college year should contact Dudley Stegge at his office, Room 200 A, for information concerning possible employment. Dean Stegge said, however, that any students on probation should not contact him about employment.

## U.S. Publications Arrive at Library

Government publications resulting from the approval of the new library as a government depository are already arriving and are being processed for student accessibility.

There are only two depository libraries permitted in each congressional district designated by the incumbent member of Congress, according to the Depository Library Act of 1962.

Processed in the same manner as other library material, the publications will be listed by their varied subject headings in the regular card catalog, and by the main heading in a separate drawer in the catalog.

Students can differentiate government documents from the data available on the shelves by the characteristic lengthy call number, which should be used in requesting a reference, and by the fact that the reference is published by the United States Government Printing Office. The federal material, situated in the periodical room, can be removed only by the library staff.

The data is deposited in the library on a cumulative, periodical basis, enabling students to have access to current material which will later have reference value.

Announcement that the United States Printing office had approved the Missouri Southern College library as an additional depository library in the Seventh Congressional District for United States Government publications was made last May 11 by Congressman Durward G. Hall. Approved libraries, of which there may be only two in each congressional district, are required to have 10,000 volumes other than government publications; make publications available for public use; have facilities to provide adequate custody and service for depository material; and fill out a report concerning operations every two years. Each library may also select from some 12,000 documents a year as well as from 7,000 to 10,000 prints of Congressional bills.

## City Council Plans Arena-Auditorium Near Mission Campus

Final plans are being prepared for a proposed \$3½ million Regional Activities Center to be located adjacent to the new college campus. Joplin city officials authorized the plans for the new building after receiving a \$100,000 planning loan from the Housing and Home Finance Agency in Fort Worth.

If the building is constructed, following voter authorization, the facility will be utilized to a great extent by MSC, according to President Leon Billingsly. Dr. Billingsly emphasized, however, that the proposed arena-auditorium will not become a reality until Joplin voters approve a substantial bond issue to finance it and that the facility would remain the property of the city.

Present plans call for the building to be located on a tract of land just east of the campus. It would be on Duquesne Road and south of Newman Road.

Among features being incorporated into the structure are a main auditorium and arena capable of handling 5,000 to 7,000 persons for a variety of activities from basketball games to stage shows.

Other smaller meeting rooms and a little theatre are also proposed.

## VA Provides Payments For Veteran Students With School Record

There is a new GI bill payment program which will enable veteran students to receive monthly payments of up to \$150 while in school. To receive this monthly "Educational Assistance Allowance," the student needs only submit to the Veterans Administration each month his own "Certificate of Attendance" over his own signature.

Those interested in this program should write for the application forms (VA Form 21E-1990). Address request to Veterans Administration Chief, Administrative Division 231Af, 1520 Market Street, St. Louis, Missouri 63103.

## CCUN Leader Goes to NYC For Institute

Earlier in the summer, local CCUN President Terry Helton, attended The National Student Leadership Institute of the Collegiate Council of the United Nations in New York City. Drawing delegates from around the world, the institute was designed to acquaint CCUN members with procedures for organizing strong local chapters, and to acquaint the delegates with other participants of the collegiate council.

During the week's tenure in New York City, Helton said that he benefited from addresses by such noted speakers as Jose Rolz-Bennett, who spoke at the U.N. Building as under-secretary for special political affairs, and Robert Christopher, senior editor of Newsweek.

Following the first class session, which will be conducted by Mrs. Annetta St. Clair, sponsor, Helton will teach the one-hour class on India offered to local CCUN members, using resource material from the institute. The MSC sophomore cited his acquaintance with a Pakistani at the institute as an especially valuable resource information.

Helton, who is also Student Senate President, sees the ensuing year as one of the most promising ever for MSC. When asked if his work would not be increased by the expansion of the college, he responded: "It will be a privilege. There will be more work, but it will be a more important job."

The statement reflects the determination with which he hopes to complete a degree in political science at MSC and continue working on a law degree.

## Crossroads Changes Sales Procedure

The Crossroads, formerly financed by activity ticket funds and delivered in May, has undergone changes in policy. Beginning this year, delivery will be made in September, facilitating the coverage of such spring events as track, golf, tennis, spring dramatic productions, and graduation.

Since the activity fund does not cover the cost of publication of the yearbook, a fee of \$5 per book is being assessed. Students not purchasing annuals during registration may do so at the booth set up in the Student Center.

## Library Schedules Classification Change

A change from the Dewey decimal system to the Library of Congress classification is planned to facilitate the increased number of volumes ordered for the new library.

Mrs. Loretta Frazier, librarian, cited the main motivation for the change as "the availability of the University of Missouri's central processing center," which uses the Library of Congress classification. Books going through the center arrive at the library already processed and ready to shelve, eliminating that phase from the work load of the library staff.

Mrs. Frazier feels that the most striking change in the new classification is the combination of capital letters and figures in the classification number of the books as opposed to the consistent use of numbers with the Dewey decimal system.

The transfer of classification will begin next spring as the books are moved to the new library. A temporary dual classification is in sight before completion of the new system over a three-year period.

## Cheerleading Squad Gains Five Members As Activities Begin

The remainder of the 1966-67 cheerleading squad was selected Monday in the auditorium. Of the fourteen girls trying out, the five elected are Christy Gladden, freshman, Carthage; Linda Lamb, freshman, Carthage; Judy Sage, freshman, Joplin; Linda Erwin, freshman, Carthage; and Kerry Bay, freshman, Neosho.

Those serving as judges included returning members of last year's squad — Karen Hollingsworth, Trinket Plumb, Patty Francisco, and Pam Eliason—and five faculty members—Miss Venus Yount, squad sponsor; Sam Starkey, John Gilmore, Mrs. Barbara Frizzell, Mrs. Bobbie Short, and Miss Eula Ratekin.

The squad made its first appearance last night at the OMA game wearing gold uniforms purchased for them by the college last year. New pom-poms were ordered recently.

## Junkins Receives National Grant For Year's Study

Supported by the National Defense Education Act, Merrell Junkins will begin classes September 26 at California State College at Los Angeles.

The psychology instructor says that the year's study is designed for junior college counselors, training them to combat the problems of the high school graduate facing college life for the first time. Plans are aimed at reducing the high dropout rate among freshmen, which is attributed in part to lack of guidance with personal problems and to inadequate placement consideration.

The grant under which the MSC teacher will work includes a stipend of \$75 per week for each participant plus \$15 weekly for each dependent. Tuition and incidental fees other than books and transportation are also provided by the grant. In mentioning the stipend, Junkins commented: "This is the first time in my life I've been able to go to school for free."

He will leave for California alone, but, after securing adequate housing and locating schools for the children, will be joined by his family.

Upon being complimented for receiving the grant, Junkins commented: "I miss Missouri Southern already, including enrollment, of which I've never been particularly fond. I also hope to return to MSC where I can try to apply the knowledge I have gained while in California."

## 1939 JJC Graduate Dies in California

Jack Eggerman, a 1939 graduate of Joplin Junior College, died at his home in Inglewood, California, June 28. Eggerman had been associated with the Surveyor Moon Project at Hughes Aircraft in California for the past five years.

After his graduation from Joplin Junior College, he received a degree in electrical engineering from Massachusetts Institute of Technology.

One of the two signboards donated by the Engineers Club is pictured as it guides visitors to the new campus from Range Line and Newman Road. The other marker is located at Duquesne Road and Seventh Street.

From Hols'ens to Shakespeare — The quiet mooing of dairy cattle in this barn will yield to the strident voices of actors and the chaos of set construction. The theatre is to contain three stages, seating arrangements, and facilities for costuming and make-up. The silo at the left is slated for offices.

The MSC Lions scrimmage in preparation for another victorious season.

## Lion Boosters Organize to Aid College Athletes

The newly-organized Missouri Southern College Lions Booster Club held a membership drive September 4-10. The purpose of the club is to help pay the room and board of out-of-district students attending the college on athletic scholarships.

The organizing committee consists of George Osborn, president; Hasley Olliver, vice-president; Dr. Paul Shipman, secretary-treasurer; Ed Junge; Miller Sanders, Dr. J. R. Kuhn; Gene Pierceall; Larry Hickey; Fred Hughes; Jim Thomas; Jack Flournoy, Jr.; and Brady Stevens.

A membership costs \$100 per year and each member receives two season passes to MSC athletic activities, reserved seating, parking privileges, and a wall plaque.

All funds are handled through the college with Dr. Shipman, Dr. Leon Billingsly, MSC president, and coaches Doug Landrith and Ron Toman acting as advisors.

## Season Will Open With Improvements At Junge Stadium

Lion football fans will appreciate improvements at Junge Stadium, site of all home games this year. The Joplin Board of Education, responsible for the stadium, has constructed additional bleacher seats, rest rooms, and a concession area on the east side of the playing field this past summer.

Starting this season, fans will be able to enter through the east gate and enjoy the Lion games without having to walk around the playing field to get to their seats or to the refreshment stands.

The additional seating raises the stadium capacity to about five thousand.

November 12, Coffeyville, Kansas, here.

## NJCAA Ranks MSC Gridders Fifth in Nation

Missouri Southern College Lions began the year ranked in fifth place in the National Junior College Athletic Association.

McCook, Nebraska; Ferrum, Virginia; Boise, Idaho; and Coffeyville, Kansas, precede the MSC gridgers. Other teams in the top 10 include Cameron of Lawton, Oklahoma; Taft, California; Arizona Western of Yuma; Northeastern of Miami, Oklahoma; and Grand Rapids, Michigan.

The Lions are scheduled to meet fourth-ranked Coffeyville, fourteenth-ranked Ft. Scott, Kansas, and seventeenth-ranked Oklahoma Military Academy.

The fifth-place ranking was a slight drop from the rank of third which the Lions attained at the end of last year's season. The drop, according to football Coach Ron Toman, was probably due to the scant number of returning lettermen.

The Lions will be in a good position to climb even higher in the standings with the tough independent schedule they face this fall.

## Prospects Report From 10 States For Grid Drills

Grid hopefuls from 10 states checked out football equipment August 22 and began workouts twice a day under Coach Ron Toman and assistants Doug Landrith and Hass Oliver.

Numbering around 50, the squad boasts of eight returning veterans averaging over 200 pounds including John Mack, fullback, Kansas City; Jay Barnhart, halfback, and Tom Alexander, guard, Peoria, Illinois; Don Turner, end, Pittsburg, Pennsylvania; David Williamson, line-backer, Baxter Springs, Kansas; Herb Winslow, guard, Marshfield; Jim Muehling, guard, St. Louis; and Roger Cumbe, center, Bradenton, Florida. The squad also includes two all-state performers, Harold Fountain of Mexico, and Terry McMillan of Coral Gables, Florida.

Adding to gridiron hopes are linemen Gay Fix, Grandview; Dave Schmidt, Milwaukee, Wisconsin; George Kingsley, Waynesville; Glen Willis, Peoria, Illinois; Aaron Nensey, St. Louis; Jerry LaRue, Miami, Florida; Tom Williams, Carthage, and Ken Henderson, St. Louis. Promising backfielders include Mike Bryant, Holden, and Clarence Thornhill, St. Louis.

With well over half of the squad tipping the scales at over 200 pounds, with experienced veterans, and with several promising rookies, the Lions put a perfect-record season on the line as they face a tougher schedule of teams this season.

MSC Gridsters should provide fans with plenty of thrills this season.

## Lions Sack Fairbury Bombers 32-6 In Gridiron Opener in Nebraska

The MSC Lions won their twelfth game in a row last Saturday night with a 32-6 rout of Fairbury, Nebraska. Coach Ron Toman's gridsters scored four times in the first half to roll up an impressive victory. Fairbury's lone touchdown came during the first three minutes of play.

Ranked fifth in the pre-season National Junior College Athletic Association Poll, the Lions looked a little ragged in their first contest. Coach Toman predicted after the first game that, "We've got a lot of work to do before playing OMA next week."

Halfback Joe Cronin of Fairbury ran the opening kickoff back to the Lions 42-yard line and the Bombers scored in seven plays. That was their last 6 points as the Lions strong defense held Fairbury to only 7 first downs.

The first scoring effort for the Lions was a 63-yard drive in 16 plays, ending with Ken Henderson snagging a 10-yard pass from Terry McMillan. Tom Kielbasa added the first of his two extra points to put the Lions ahead 7-6.

Then with less than a minute in the first period remaining, halfback Harold Fountain latched on to a McMillan pitchout and stormed 11 yards into the end zone.

The Lion defensive team scored the next six points when defensive halfback Kenneth Hall blitzed into the Bomber backfield and grabbed a pitchout and

steamed into the end zone from the 20.

With only seven seconds left on the clock at the end of the first half, McMillan scored from the nine on a keeper play.

The third quarter was scoreless and MSC's final touchdown did not come until there was only two minutes left in the game. Jay Barnhart, Lion halfback, bowed his head and crashed one yard to paydirt. The play climaxed a 45-yard, eight play drive.

Barnhart and John Mack carried the brunt of the Southern rushing attack with Barnhart rambling 66 yards in 16 carries, and Mack carrying 15 times for 61 yards. MSC gained 241 yards on the ground and added another 76 yards through the air.

Each team lost the ball on fumbles twice as first game jitters took their toll.

The lion defensive team snagged three Bomber passes but only one Southern pass was intercepted. Southern punted four times while Fairbury gave up the ball only twice on punts.

Missouri Southern's next contest is September 24 at Highland, Kansas. The first home game is October 1 with the tough Connors A & M.
